DECLARE THE GEOGRAPHY MAJOR

There are three steps that you need to take in order to declare a major in geography:

1. Optional: Attend a Geography Major Information Session. The full list of upcoming sessions can be found below.

2. Required: Complete the Geography Major Student Survey by clicking the purple button below. Please note that this form requires you to log into your browser with your UW NetID; if you are logged into Google – or even just your browser – with a different Google account, the form will not allow you access. In that case, please open this page in a private/incognito browsing window and then click the purple button below so that Google will prompt you to log in with your UW NetID to access the form. Still doesn't work? Please be sure you have activated your UW G Suite.

Please review the information available in Undergraduate Programs and Degree Options. To access the form, click the button below.
